 CAPACITY LOADS - MINIMUM CHARGE
 DEFINITION

1. The term "CAPACITY LOAD" or "LOADED FULL VISIBLE CAPACITY" refers to the extent to which a VAN DOUBLES TRAILER is loaded with freight, meaning:
 - a. The quantity of freight which because of unusual shape or dimensions or because of necessity or segregation from other freight requires the full capacity of van or doubles trailer.
 - b. That quantity of freight which, in the manner loaded, so fills a van or doubles trailer that no additional article in that shipping form tendered identical in size to the largest article in the shipment can be loaded in or on the van or doubles trailer regardless of whether another article is tendered for loading as part of the same shipment.
 - c. That quantity of freight that can be legally loaded in or on a van or doubles trailer within size and weight limitations of state or regulatory bodies.
 - d. That quantity of freight which, in the manner loaded, so fills a van that less than seven (7) linear feet of floor space remains.
 - e. That quantity of freight which, in the manner loaded, so fills a doubles trailer that less than four (4) linear feet of floor space remains.
2. The term "DOUBLES TRAILER" means a trailer of 29 feet or less in length.
3. The term "VAN" means a trailer of 30 feet or greater in length.

MINIMUM CHARGE

Any shipment which occupies the full visible capacity of a van or doubles trailer as defined above will be subject to the following minimum charge using tariff AACT 501 series:

- a. MINIMUM CHARGE PER VAN Class 100 at 10,000 lbs. discounted 50%.
- b. MINIMUM CHARGE PER DOUBLES TRAILER Class 100 at 5,000 lbs. discounted 50%.

GENERAL PROVISIONS

1. Each van or doubles trailer loaded to capacity will be subject to the minimum charge stated above. When the charge is applicable to any van or doubles trailer in the tender, the charge for that overflow portion of the shipment loaded in the last van (not loaded to capacity) will be rated as a separate shipment.
2. The Bill of Lading or Freight Bill will indicate the number of vans or double trailers loaded to capacity and any excess which is less than a capacity load.
3. Upon request of the shipper, AACT will attempt to furnish the largest van or doubles trailer available. The shipper will have the right to refuse the van or doubles trailer furnished, but once loading has begun, the provisions of this item will apply.

 Per Pound per package \$2.00

4. On shipments handled by AACT in connection with another carrier (either Motor; Water or Rail), the lesser of either carrier's maximum liability provisions will apply. FOR EXAMPLE: If the other carrier's maximum liability on a specific shipment is \$5.00 per pound per package and AAA Cooper Transportation's maximum liability is \$9.80 per pound per package, the maximum liability of the other carrier and/or AACT will be \$5.00 per pound per package.
5. ITEM 570 LIMITED LIABILITY AND FULL VALUE COVERAGE, CARGO LOSS OR DAMAGE ITEM 570
 (Conc.) PART VI -- FULL VALUE COVERAGE: EXTRAORDINARY VALUE (Conc.)

- Commodities tendered for shipment with an invoice value exceeding values stated in Part I will be considered to be of "Extraordinary Value".
- If shipper desires to tender a shipment to AACT requiring carrier liability in excess of the limited liabilities named in this item, the shipper must indicate such in writing on the Bill of Lading at time of shipment, along with the invoice value of the shipment in substantially the following manner:
 "FULL VALUE COVERAGE REQUESTED - INVOICE VALUE: \$ _____."

 EXAMPLE: 1,000 pound shipment with an invoice value of \$30,000.00 is \$30.00 per pound which exceeds the limited liability provisions named in this item.
 A customer requiring "Full Value Coverage" would show on the Bill of Lading at the time of shipment: "FULL VALUE COVERAGE REQUESTED - INVOICE VALUE: \$30,000.00"
- Charge per \$100.00 for "Full Value Coverage": Between points in Continental U.S.A..... \$0.65
 Between Continental U.S.A. and Canada or Puerto Rico\$0.70
 Minimum Charge Per Shipment\$35.00
 For all other International traffic, call for quote.
- "Full Value Coverage" includes the amount of the invoice supplied by the shipper or consignee, plus the prepaid or collect freight charges not included in the invoice, plus 10.0% calculated, as follows:
 EXAMPLE: 1. INVOICE AMOUNT - \$30,000.00, plus Freight Charges of \$395.50 = \$30,395.50
 2. AMOUNT OF COVERAGE - \$30,395.50 multiplied by 110% = \$33,435.05
 3. \$100.00 UNITS - \$33,435.05 divided by 100 = 334.35
 4. FULL VALUE COVERAGE CHARGE = 334.35 multiplied by \$.65 = \$217.33
- Unless otherwise indicated on the Bill of Lading at time of shipment, charges for "Full Value Coverage" will be paid by the party responsible for the freight charges.
- When the rate and/or class is dependent upon released value as provided in the NMFC 100 series and "Full Value Coverage" is requested, the customer will receive benefit of lowest released value for the purpose of determining the applicable rate and/or class published in the NMFC 100 series.
- "Full Value Coverage" is available on traffic moving between points within the 48 contiguous United States, as well as between points in the 48 contiguous United States and points in Canada or Puerto Rico. Full Value Coverage will be added to all LTL Puerto Rico shipments unless specifically waived by the customer.
- Full Value Coverage may not be available on all commodities or values. For example, other than new items, items not properly packaged, perishable items, or prohibited items (as can be found in Item 780 of this Rules Tariff) are not eligible for "Full Value Coverage."

NOTE A-- When shipments move in international commerce between the USA and Canada the carrier's maximum liability will be \$2.00 per package.
 NOTE B-- Liability for loss, damage, or delay of cargo moving between Mexico and other countries: With respect to any shipment originating outside Mexico with ultimate destination in Mexico or any shipment originating within Mexico with ultimate destination outside Mexico, AAA Cooper Transportation shall have no liability, either for itself or for the Mexican carrier involved in the move for loss, damage, or delay while in the possession of the designated brokers, freight forwarders, or Mexican carriers.

ITEM 580 MARKING OR TAGGING FREIGHT ITEM 580

- When it is necessary to mark or tag a shipment to assure that the freight is sent to the proper consignee and destination, AACT will perform this service upon request. As a necessary condition AACT will also remark freight that is reconsigned.
- The charge for marking or tagging will be:
 Charge Per Package or Piece of Freight\$1.75
 Minimum Charge Per Shipment\$23.00
- Charges are to be paid by the party requesting this service or guaranteed before the service will be performed. When freight is remarked or retagged as a necessary condition these charges will be payable by the party responsible for payment of the freight charges.

ITEM 610-01 MINIMUM CHARGE - HOUSEHOLD GOODS OR PERSONAL EFFECTS ITEM 610-01
 The Minimum Charge for an LTL or AQ shipment of Household Goods or Personal Effects, as described in NMFC Items 100200 and 100262, moving under rates in tariffs governed by this tariff, will be the charge for 500 pounds at the applicable rate, but not less than the Minimum Charge published between the origin and destination in which the traffic is moving.

ACCESSORIAL CHARGES AND RULES

ITEM 610-600 MINIMUM CHARGE--LOW DENSITY FREIGHT/BULKY OVER-SIZED SHIPMENTS ITEM 610-600

(CUBIC CAPACITY MINIMUM)

SECTION I - DEFINITIONS

1. ACTUAL CLASS: Classification assigned to an article or commodity as published in NMF 100 series.
2. CUBIC CAPACITY CLASS: Class 175, 200, 250 or 300 as determined by the application of this item.
3. FAK CLASS: A single class which has been approved by AACT to be applied to all articles and/or commodities transported for the account of a specific customer and provided for in a publication, contract or transportation agreement.
4. EXCEPTION CLASS: An exception to the class published in the NMF 100 series, which has been approved by AACT to be applied on specific articles and/or commodities transported for the account of a specific customer and provided for in a publication, contract or transportation agreement.

SECTION II - AVERAGE DENSITY

Shipments subject to this rule will be determined by either of the following conditions:

1. Shipments which occupy 830 cubic feet or more of trailer space with an average density of less than 4 pounds per cubic foot; OR
2. Shipments which occupy 13 linear feet or more of trailer space with an average density of less than 4 pounds per cubic foot.

SECTION III - CHARGES

The Minimum Charge on shipments subject to this item as provided in SECTION II, will be determined as follows:

1. CUBIC CAPACITY CLASS: The class rating to be used for determining these charges will be:

When the density is:

| | |
|---|-----------|
| Less than 1 pound per cubic foot | CLASS 300 |
| 1 pound, but less than 2 pounds per cubic foot | CLASS 250 |
| 2 pounds, but less than 3 pounds per cubic foot | CLASS 200 |
| 3 pounds, but less than 4 pounds per cubic foot | CLASS 175 |

Density (pounds per cubic foot) is determined as provided in ITEM 490 (DENSITY--METHOD OF DETERMINING) of this tariff and SECTION IV of this item.

2. RATES: The applicable rates to be used in connection with the class determined in Paragraph "1" of this Section will be those named in the publication, contract or transportation agreement having application to the shipment. If the applicable rates are a single FAK CLASS with no Class 175, 200, 250 or 300 then, the FAK rate per cwt will be subject to an ADJUSTMENT FACTOR that will be determined by dividing the CUBIC CAPACITY CLASS determined in Paragraph "1" of this Section by the FAK CLASS.

EXAMPLE: CUBIC CAPACITY CLASS 250 divided by FAK CLASS 70 = 357% ADJUSTMENT FACTOR

If FAK CLASS 70 = \$10.00 multiplied by ADJUSTMENT FACTOR 357% = RATE \$35.70 per cwt.

3. DISCOUNTS: Discounts provided for in the publication, contract or transportation agreement having application to the shipment will be applied to the gross charges determined above.

SECTION IV - HEIGHT

The average density and total cubic feet a shipment requires will be determined by the total cubic feet of each unit in the shipment in accordance with the provisions of Section 8 of Item 110 of NMF 100 series and ITEM 490 (DENSITY--METHOD OF DETERMINING) of this tariff, except:

A vertical dimension (height) of 96 inches shall be used to determine the cube of any unit on top on which freight cannot be loaded because of:

1. The nature of the article or articles as tendered for shipment; or
2. Packaging, or lack of packaging, used; or
3. Palletization in a "pyramid", "rounded off", or "topped off" manner; or
4. Specific instructions by the shipper on the Bill of Lading to the effect that no freight is to be loaded on top of the articles.

SECTION V - LOADING BY SHIPPER

When loading of the vehicle is performed by the shipper, or its agent, the cubic footage will be determined by the manner in which the shipper, or its agent, loads the shipment. AACT may rearrange the shipment to comply with the legal requirements of state or other regulatory bodies.

SECTION VI - LOADING BY CARRIER

When loading of the vehicle is performed by the carrier, the carrier shall load as fully as conditions permit consistent with safety and precautions against damage and any loading or packing conditions requested by the shipper and noted on the Bill of Lading. The carrier shall use the least amount of cubic capacity possible, observing all legal requirements of state or other regulatory bodies.

SECTION VII - MEASUREMENTS

1. When a shipment is loaded first in the vehicle, the cubic footage will be determined by measuring the inside length of the vehicle along the floor starting at the front of the vehicle and stopping at the furthestmost point toward the rear where the shipment ends. The width and height (See SECTION IV) will be determined by measuring the space occupied by the shipment. In the event a shipment is equal to or exceeds 54 inches in width, the full width of the trailer will be used in determining capacity.
2. When a shipment is not loaded first in the vehicle, the cubic footage will be determined by measuring the inside length of the vehicle along the floor starting from the furthestmost point where the prior shipment ends and stopping at the furthestmost point toward the rear where the shipment ends. The width and height (See SECTION IV) will be determined by measuring the space occupied by the shipment.
